

Silver Care Toothbrush

- The Silver Care self-sanitizing toothbrush is designed with grainy filaments (plus 39% interdental penetration) providing a cleaning power that extends beyond the tips.
- On contact with water, the 999 pure silver that covers the head activates a natural and continuous self-sanitizing process preventing the growth of bacteria.
- Increases the removal of bacteria plaque, ensuring gentleness against the delicate tissue of the gums.
- Silver Care toothbrush comes in two different grains, soft and medium.
- Each Silver Care Toothbrush head should last up to six month, a second replacement brush is also included.
- The Silver Care Toothbrush is available in four colors, red, blue, lilac and mint.

Toothbrush [refills available](#) (package of two)

Silver Care Dental Floss

Treated with fluoride and silver nitrate. Fluoride reduces the acids caused by plaque and the silver is an effective bactericide/disinfectant. The silver helps kill the bacteria between the teeth and gums that cause plaque.

Mint Flavored
